Your Journey Written in the Stars

OBSERVE THE SKY. RECORD YOUR LIFE.

How to Use This Planner

This is a record of observation, not a script for your day. Notice the sky, document real experience, and compare the two with curiosity.

1 OBSERVE

Read the calculated transits and note what draws your attention.

2 RECORD

Track events, mood, body signals, decisions, and context in your own words.

3 REFLECT

Ask what matched, what did not, and what pattern is actually supported by your notes.

CALCULATION STANDARD

- Tropical zodiac; geocentric planetary positions
- Swiss Ephemeris with built-in Moshier planetary calculations
- Daily placements sampled at 12:00 UTC; exact events include UTC time
- Calendar dates follow the UTC time zone
- Production release must be cross-checked with the nanami-astro engine

ABOUT YOUR DATA

PRIVACY FIRST

Do not paste names, addresses, medical identifiers, or private third-party details. AI output can be mistaken. Use it to organize observations, not to make medical, legal, financial, or safety-critical decisions.

COPYABLE REFLECTION PROMPT

I am reviewing a personal journal entry alongside an astrology transit list. Separate observations from interpretations. Summarize what happened, identify repeated themes, note evidence that does not fit the transit description, and suggest three neutral questions for future observation. Do not predict events or treat astrology as proven causation.
